

## **WnSoft Announces the Release of PicturesToExe Deluxe 5.5 With New Features**

**June 10, 2008**—WnSoft has announced new version of PicturesToExe Deluxe 5.5, a powerful slide show software for all Windows operating systems including Vista, with genuinely unique features designed to bring the simplicity and convenience of creating impressively beautiful and professionally-looking slide shows consisting of any number of pictures in a standalone EXE file or SCR format (screen saver) to home PC users, amateur and professional photographers, designers, painters, lecture readers, teachers, and all the people desiring to make their interactive galleries or presentations look both wonderful and gorgeous.

### Key features of PicturesToExe Deluxe 5.5

Pan/Zoom effects in real-time with highest quality. Sharp picture and smooth animation.

Timeline is integrated to the main window now.

Slide list displays pictures of real slides.

Preview displays real slide at top-right part of the main window.

Added mini-player to the main window. You can quickly play your slideshow in this small preview window.

Added Grid (Ctrl+G) to "Objects and animation" editor.

Improved reliability of VideoBuilder.

Full and detailed list of changes is available here: [What's new in version 5.5](#)

To this moment, PicturesToExe Deluxe 5.5 has been reviewed and awarded by several very respectable photo-related printed magazines and all of them emphasized the success of the solution by not only warm words, but also by proud and incontestable facts of PicturesToExe Deluxe, which were well-earned by WnSoft's hard work:

*"... PicturesToExe Deluxe is an amazing piece of presentation software that defies all the usual rules. It's inexpensive, easy to learn, very powerful, undemanding in terms of computer resources and it produces wonderful results."* February 2008, The Photographer, the UK

*"... With simple installation, a straight-forward interface and output options, Wnsoft PicturesToExe for Windows has been popular with professional photographers for years, for its speed and the ease of show production."* December 2007, Professional Photographer Magazine, the USA

## **About PicturesToExe Deluxe 5.5:**

PicturesToExe Deluxe v5.5 supports JPG, GIF, PNG, and BMP formats. Once an EXE file with a slide show is created, it can be played on any PC, sent by e-mail to family members or friends, or uploaded to any website – neither any additional program nor PicturesToExe itself is needed in order to view created presentation. The tool has very [easy-to-use and intuitively understandable interface](#) translated into [19 languages](#) allowing inexperienced PC users to create their own slide show within seconds and without any hassles at all.

The developers from WnSoft have made PicturesToExe completely customizable by adding a wide flexibility in the options of creating slide shows, so that users could literally tune everything in their presentations – for each slide it's possible to add background color, objects ([images, text labels with drop shadows](#)), music and sounds (MP3, WAV, OGG, WMA, or MIDI formats), comments. Moreover, it's possible to apply amazing top quality cinematographic transition effects between each slide. Also, PictureToExe has important feature for slide show synchronization to background music by placing points on time-line. It's important to mention that presentations can be run automatically (by timer), controlled manually, run once, or continually. If required the slide show can be protected by password and/or expiration date of the interactive gallery can be set by user.

A very special feature of PicturesToExe Deluxe 5.5 is the possibility to turn a slide show into a standalone executable file (\*.exe) or standard screen saver for Windows. Additionally, users of PicturesToExe can also simply save their slide shows as a video file (\*.avi). No more expensive and heavyweight products needed in order to create and play a slide slide show – what can be valued by teachers and presenters. It's now possible to carry everywhere a small flash drive with only one EXE or AVI file which can executed anytime and anywhere. Having VideoBuilder, PicturesToExe Deluxe 5.5 is currently the only affordable solution on the market for making DVD-Video discs playable on any DVD players, PC, or MAC and there is no need to order such services at studios anymore – with PicturesToExe Deluxe v5.5 everyone can do it easily at home!

Other features of PicturesToExe include adding of any preferable Icon to executable files of slide shows, customizable Navigation Bars, creating of Backups, saving Projects in PicturesToExe's own format (PTE), support of Downloadable Templates, Pan/Zoom/Rotate Effects for images, support of multi-select and visual drag-n-drop between file panel and Slide list, built-in Player in slide shows.

Taking in the account that PicturesToExe Deluxe has exceptionally fine and smooth Pan/Zoom effect giving out pictures of the highest quality in a slide show, no other product today can compete with PicturesToExe Deluxe 5.5. The solution gives much more interesting and attractive possibilities for keeping great memories of past events impressing not only friends and family members, but also any person viewing a slide

show created in the tool. In order to see full potential of the product, please view below sample slide shows created with PicturesToExe Deluxe 5.5

### **Sample slide shows created with PicturesToExe Deluxe 5.5:**

1) Sample slide show with amazingly beautiful animations:

<http://www.wnsoft.com/apr/show/PteShow.zip> (8 MB)

Please note: to view this sample gallery it's recommended to have a video card with 128 MB memory installed for an ideally smooth playback. However, keep in mind, any computer and any video card is suitable for the creation of a DVD-Video disc.

2) This sample slide show can be viewed on any PC:
